

A robotic hand, rendered in a realistic style with grey and white segments, is shown holding a vibrant orange and black butterfly. The background is a dark blue space filled with numerous small, glowing blue and white particles, creating a digital or futuristic atmosphere. A diagonal split in the background separates a black upper-left area from a white lower-right area, with a red diagonal band crossing between them.

# COMPANY PROFILE

Enabling the Digital Enterprise

**OVATIONS**

EVALUATE | INNOVATE | TRANSFORM

# WHY OVATIONS?

A leader in enterprise digital enablement and a leader of people enablement

We drive business strategy and change with integrated technology solutions and expertise and we believe that for your business to function seamlessly, the alignment of technology and process with your people is paramount

We have an advantage by being in the technological domain, a domain that is growing and has more influence than any other; we leverage this influence to demonstrate societal change and the empowerment of all people and by being a level 2 BBBEE South African ICT Company

OVATIONS

# ENABLING THE DIGITAL ENTERPRISE

South African business leadership has always been early adopters and significantly use technology to improve productivity, gain efficiency, reach new markets, optimise supply chains and drive business outcomes.

A significant shift is that customer expectations have changed radically from the past. The challenge facing all South African and global organisations for that matter is:

- How can they best respond to this paradigm shift?
- How can they take advantage of the opportunity to innovate and grow through technology adoption? And,
- How can they do all this as cost effectively as possible?

This in Oventions' opinion is a strategic journey of Digital Enablement and includes the critical intersection with Cloud Adoption as a key enabler. Oventions believe that Digital Enablement incorporates the application of modern technology in all aspects of business and society, and that Cloud Adoption is the way in which all business will implement and accelerate Digital Enablement.

Oventions has core domain expertise in process automation, content services, data and analytics, financial crime and risk prevention solutions. As Oventions, we also provide guidance to our customers through an entire lifecycle of the cloud adoption process including initiatives to mitigate strategic workloads to the cloud deployment models. We offer the following services across our value propositions:

- Strategic Resourcing
- Strategic Advisory:
  - Strategy and Roadmaps
  - Maturity Assessments
  - Modelling and Architectures
  - Implementation and Migration Planning
- Implementation Services and Bespoke Development:
  - Foundational Capabilities / Landing Zones
  - Product Discovery and Blueprint
  - Minimum Viable Product
  - Cloud Native Application Development / Modernisation (Agile and DevSecOps)
  - Partner solutions including Proof of Concept / Pilot / Full Implementation
- Workload Migration
- Support, Maintenance and Management

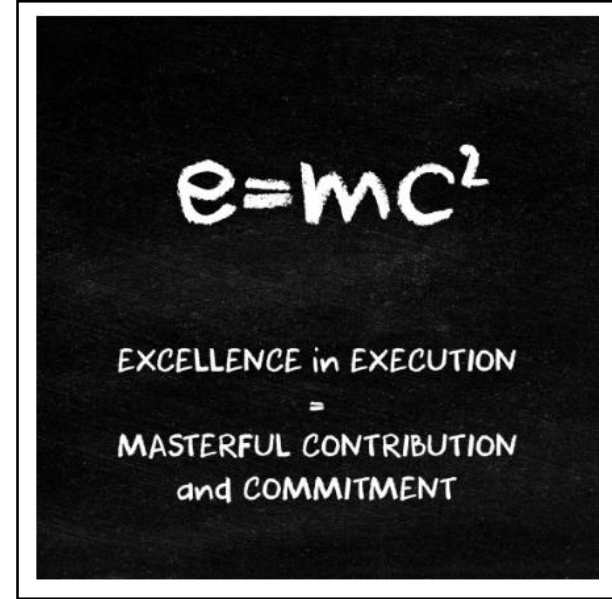

OVATIONS

# OUR PURPOSE

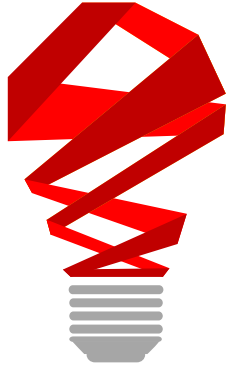

Our purpose is to enable the digital enterprise, but how we do that is what makes our team exceptional.

$E=MC^2$  is our formula to success - meaning Excellence in Execution = Masterful Contribution and Commitment. At Ovations, we ensure that excellence and enablement are at the core of everything we do and in every member of our team - from design-thinking, development and execution to business value realisation, and of course, in the relationships with our clients.

Each employee strives to achieve excellence in a meaningful and masterful contribution to the value creation for customers, self-actualisation, and the success of the company.

OVATIONS

**“The digital sphere is one that continues to grow exponentially every day”**

## OUR COMMITMENT

At Oventions, we are committed to creating and nurturing relationships with our clients, ensuring that we acknowledge and understand the unique challenges and opportunities of each client, and strategise accordingly.

No client takes priority over another, and we are committed to not only meeting their ICT needs as their business grows but driving this growth in every way we can.

Oventions is also committed to embracing transformation not only in the ICT sphere but in the country as a whole. We strive to embody the diversity of South Africa in all that we do, and in so doing, we are proudly a level 2 BBBEE contributor.

## OUR PARTNERS

We, as all businesses do, operate across various ecosystems. Within these ecosystems we create sustainable relationships with co-existing companies and clients. These relationships allow us to obtain, exchange and integrate valuable skills and insights for the growth of Ovations. We leverage these skills and insights to support each business engagement, helping to ensure sustainable growth of our clients' companies.

# VALUE PROPOSITIONS

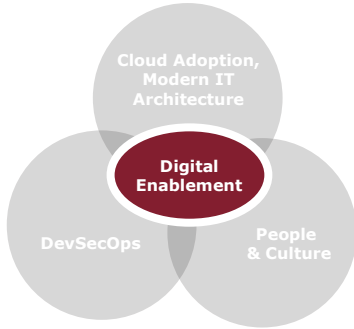

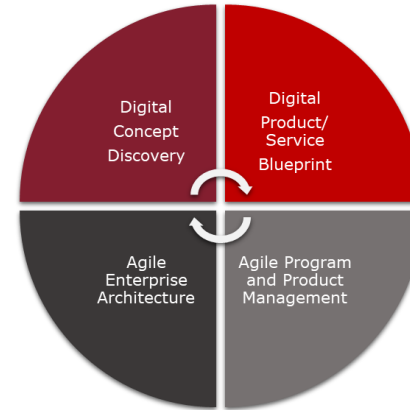

# DIGITAL ENABLEMENT & OPTIMISATION

The Digital Enterprise faces multiple challenges, including new technologies (e.g. cloud, internet of things, robotics, machine learning, etc.) and new techniques (e.g. agile software development, continuous delivery, digital product management, etc.). To cope with this fast pace of evolution, change should be pervasive throughout your whole organisation and IT must design itself in such a way that it will benefit from the change and position the rest of your organisation to leap ahead of the competition.

Our Digital Enablement and Optimisation offering helps our clients to assess and mature their architectural landscape from a people, processes, information and technology perspective. Our value proposition drives the capabilities necessary for a Digital Enterprise and we can help you establish these, evolve your legacy and help keep stakeholder value top of mind.

## KEY BENEFITS

- Connect your strategy activities with your execution activities and track digital investments
- Align IT investment with your business strategy and business unit priorities
- Optimise IT assets, resources and capabilities
- Adopt techniques to assess and rationalise your application portfolio
- Ensure teams have the information they need to build an exceptional product or service
- Establish and scale modern agile software development practices for improved throughput

# CLOUD ADOPTION, MODERN IT ARCHITECTURE & DEVSECOPS

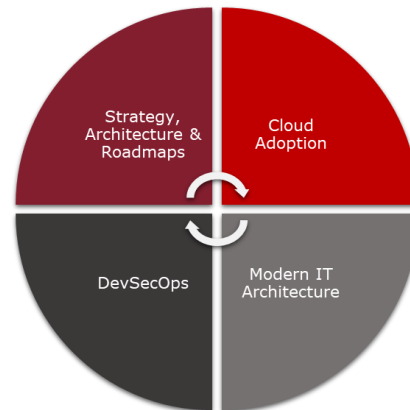

Companies must be agile in today's highly competitive, and often global markets. IT systems that support business agility have been driving the adoption of modern IT architectures, including microservices and serverless in a cloud-native approach.

Our approach not only has a "security first" approach, but also consider many other factors to ensure we implement systems that can realise the benefit of business agility and position your organisation ahead of the competition. We help you ensure streamlined business value delivery through the strategic adoption of DevSecOps thinking and techniques to complement existing delivery practices.

## KEY BENEFITS

- Reduce IT infrastructure and operational costs by switching to managed services
- Pay-per-use model allowing you to scale the business with rapid elasticity (capacity on demand)
- Managed transition from monolithic architecture to a more modern microservices and serverless architecture
- Optimise and streamline development and IT management
- Rapid adjustment to changing market/industry conditions
- Agile on-top of a DevSecOps approach – value realisation from the first sprint

# DATA & ANALYTICS

Data &  
Analytics

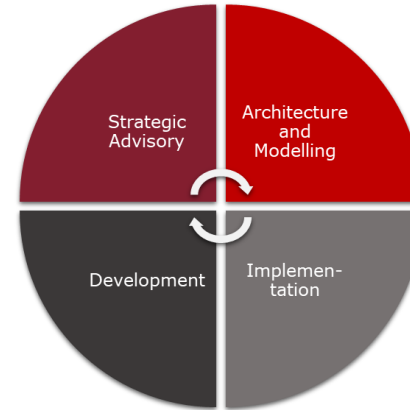

Ovations Data and Analytics result in data driven smart decision-making and proactivity in anticipating the needs of your company and clients, mitigating risk and fraud, delivering relevant products, personalisation, and the optimisation and improvement of service and customer experience.

We can assist to build a modern, agile and reliable, information foundation for your business to deliver holistic insights and answers into increasingly complex business questions, at the speed of business.

The Ovations Data and Analytics value proposition is built on domain specific capabilities that can stand on its own, however, the niche for Ovations Data and Analytics resides in the overlap of these capabilities with our other value propositions, Process Automation, Content Services and Fighting Financial Crimes.

## KEY BENEFITS

- Strong partnerships and relationships
- Access to technical resources in key roles
- Pre-assessment, analysis, planning and advisory
- Modern approaches
- Future proof

# PROCESS AUTOMATION

Process  
Automation

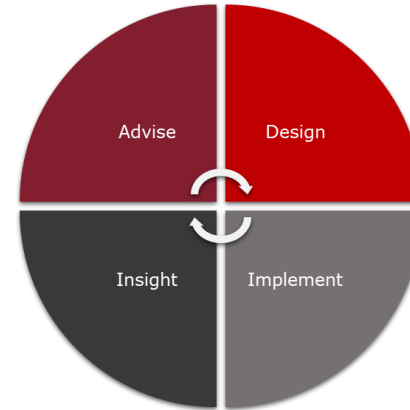

Intelligent Process Automation (IPA) technology has enabled various business activities to be automated, expanding your human workforce with a virtual workforce that ensures accuracy and efficiency.

IPA creates business value and gives your business the ultimate competitive advantage by integrating all operations, developing your businesses ability to grow and adapt and increasing efficiency.

We leverage emerging technology to cope with this fast pace of evolution and optimise business processes across major industry verticals and common business functions.

## KEY BENEFITS

- Fast track the journey to Digital Transformation
- Effective Customer Engagements and Experience
- Standardisation, Collaboration, Visibility and transparency in Processes
- Increased Efficiency and productivity
- Statutory and Regulatory Compliance

# CONTENT SERVICES

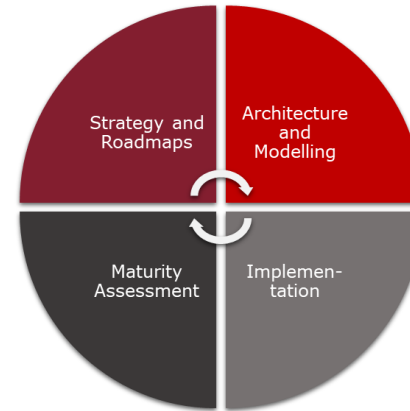

Content  
Services

Content Service (CS) Solutions are principled in integration, bringing together architecture supportive of on-premise and hybrid cloud services, a multi-repository approach to manage content regardless of its source repository, and intelligent functions to analyse and streamline the delivery of your content. The latter enables insightful development of operational goals, retention of business knowledge, regulatory management and process efficiencies.

Content Services is an alternative strategy to provide a more practical, multi-repository solution to achieve the benefits promised by the original vision of Enterprise Content Management (ECM).

## KEY BENEFITS

- Digital workflows, just-in-time content delivery and faster
- Automated and defensible content disposal
- Optimal storage and archival media with resources reallocated to more innovative pursuit
- Analytics of customer data for better decision making
- eDiscovery and Sentiment analysis

# FIGHTING FINANCIAL CRIME

Fighting  
Financial  
Crimes

At Ovations, we work with you, using our skills and knowledge gained through multiple client engagements to support you in your fight against financial crimes.

We cover key areas such as Know-Your-Customer (KYC), Anti-Money Laundering (AML), Counter Financing of Terrorism (CFT) and Enhanced Due Diligence (EDD) – all of which ensure insightful, efficient and effective risk decisions about your clients and counterparties.

Not only do we apply our own knowledge and experience gained through multiple solution implementations throughout Africa, but we also partner with international enterprise solution providers and therefore leverage their experience to provide you with the best solution to fighting against financial crimes.

## KEY BENEFITS

- Provide Strategic Advisory services for Regulatory Review Preparation and Remediation
- Providing support and implementation of Solutions addressing AML/CFT and Sanctions Controls
- Partnering with Global Industry Leaders in Regulatory Reporting and Compliance to bring leading edge solutions to you
- Reduce the time required for Alert Remediation, Adverse Media Screening, Enhanced Due Diligence, and Ongoing Monitoring
- Protecting employees by automating the distribution of policies, tracking outside business interests and logging any conflict of interests
